

HA 600

- Dispensing system for UV Flexo inks.
- High dosing speed.
- Completely automatic and easy to use, the system allows the operator to produce the required quantity of ink in few easy steps, with a very high accuracy standard.
- Total reproducibility of formulas.
- 12 to 36 inks tanks with different capacity (3, 6, 10 and 20 liters).
- Electric can lifter.
- Unique central dispensing point.
- Very small dimensions.

ADVANTAGES

- Stock reduction and rationalisation
- Instant reproducibility of colours
- Productivity improvement
- Save space and manpower
- Environmental protection
- Security and working condition improvement
- Production return management

TECHNICAL DATA

Number of components

Up to 36

Dispensing accuracy

0,1 g.

Containers

Mettallic, plastic or bottles

Dispensing Time

Dimension (HxWxD)

2 minutes for a 5 Liters pail

1830x1150x1270
